LIGHT

Pb free product—RoHS compliant High Photo Sensitivity Reliable and rugged Long life – solid state reliability Sensitivity angle: 135°

Package Dimension

Suggest IR Reflow Condition For Lead Free

- 1. Reflow soldering should not be done more than two times.
- 2. When soldering, do not put stress on the LEDs during heating.

Soldering iron

- 1. When hand soldering, the temperature of the iron must less than 300 for 3 seconds.
- 2. The hand solder should be done only once.

Repairing

Repair should not be done after the LEDs have been soldered. When repairing is unavoidable, a double-head soldering iron should be used (as below figure). It should be confirmed beforehand whether the characteristics of LEDs will or will not be damaged by repairing.
